

DOWNLOAD Our Payment App

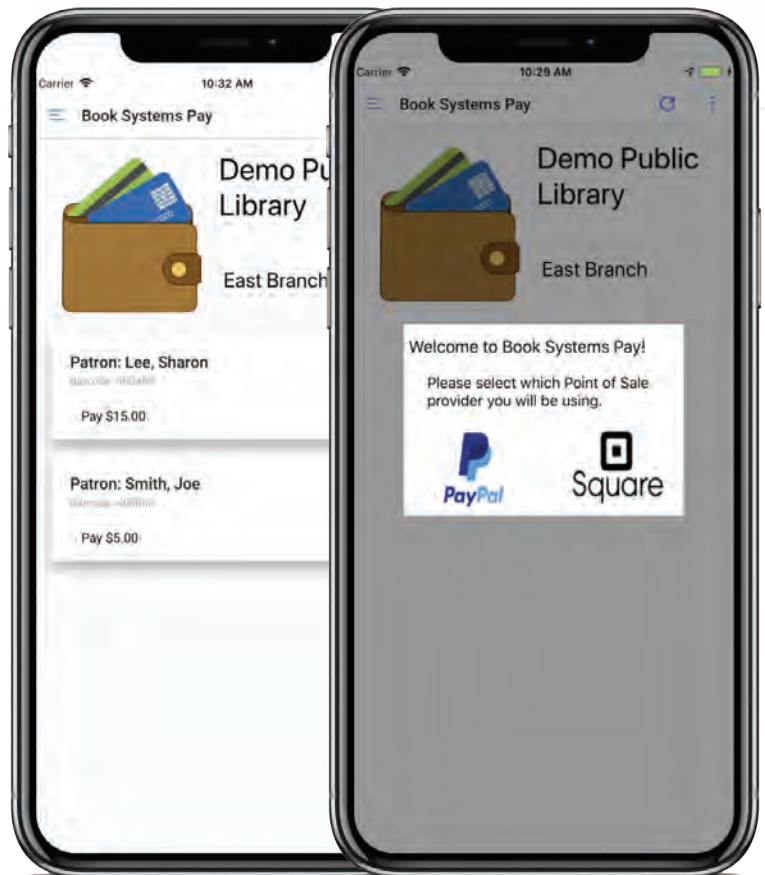

Book Systems Pay allows you to process electronic payments for your patrons. Accepting credit payments is just another convenience your library can offer your patrons; it can also alleviate issues with making change from your cash drawer. The app is integrated with your Atrium database for real-time account updates when fines/fees are processed. Book Systems Pay works with PayPal and Square card readers.

- Allow location detection so you can easily find your library and connect.
- Initiate the transaction in Atrium and complete it with the app; payments are automatically synced to the patron's record.
- Easily switch between card readers if you use both.

Note: For library staff use only.
